Warren Cat

West Texas A&M University

Western Equipment

This seminar is made possible by the support of the TCFA Allied Industry Committee.

Why Attend a Seminar on Equipment Safety?

Equipment in the feedyard is one of the greatest areas of safety concern, because of the power, size and scope of the various machines and rolling stock that a feedyard has on hand. Operating this wide variety of equipment is an area of feedyard safety that must never be overlooked and where continual training is necessary. Topics covered will include safety, use, upkeep and maintenance for major equipment in a feedyard.

This seminar will also provide training on welding safety, cutting torch safety and new techniques and equipment for metal fabrication.

Training will be provided by representatives from BJM Sales & Service, Lincoln Electric, Warren Cat, WTAMU & Western Equipment. Certificates of completion will be provided to all participants.
